PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and maintaining robust web applications using modern technologies. Strong backend engineering expertise with PHP, Laravel, and Node.js, along with solid frontend skills using React.js, Next.js, and Tailwind CSS. Proven ability to design scalable APIs, optimize databases, implement secure authentication and authorization systems, and integrate third-party services. Passionate about delivering efficient, maintainable, and user-centric software solutions.

TECHNICAL SKILLS

Backend Development

- PHP
- Laravel
- JavaScript
- Node.js
- Python
- RESTful API Development
- Authentication & Authorization
- Role-Based Access Control
- Server-Side Logic
- Backend Architecture
- Redis

Frontend Development

- React.js
- Next.js
- Tailwind CSS
- UI/UX
- API Integration
- Alpine.js

Databases

- MySQL
- PostgreSQL
- MongoDB

Tools & Development

- Git
- GitHub
- Postman
- Visual Studio Code

PROFESSIONAL EXPERIENCE

THE HELPEX — 1 Year
Full Stack Developer

- Developed and maintained full-stack web applications with a strong focus on reliable backend systems and user experience.
- Built RESTful APIs using Laravel and integrated them with modern frontend frameworks.
- Designed and optimized SQL databases and ensured data for performance, maintainability, and scalability.
- Implemented authentication, authorization, and role-based access control systems.
- Worked across both backend and frontend components of web applications.
- Collaborated with the development team to build, improve, and maintain robust software systems.
- Contributed to application architecture, backend logic, API development, database operations, and frontend integration.

SYRID — 3 Months
Frontend Developer (Intern)

- Developed responsive and interactive user interfaces.
- Integrated frontend applications with backend APIs.
- Worked on improving application performance and overall user experience.
- Collaborated within a development environment to implement frontend features.

SELECTED PROJECTS

LEMS — Luxorix eCommerce Management System — Laravel | MySQL | Redis | Alpine.js | Firebase

Developed an enterprise-level commerce management system over approximately 1.3 years of continuous development. The system includes 40+ modules with custom ERP, HRMS, SQC, and POS functionality. Implemented security-focused SOC/SOAR capabilities, AI integrations, Meta integrations, and real-time features. Built on a robust Laravel backend with a MySQL database architecture, utilizing Redis for caching and performance optimization and Firebase for additional application functionality.

Multi-Vendor E-Commerce Platform — Laravel | MySQL | JavaScript | Tailwind CSS

Developed a multi-vendor e-commerce solution with custom marketplace functionality. Implemented role-based access control, integrated third-party services, and developed analytics functionality. Built scalable backend features using Laravel and MySQL and created responsive frontend interfaces using JavaScript and Tailwind CSS.

Campus Coin — Budget Bee Next.js | Express.js | Node.js | MongoDB

Developed a student-focused money tracking application for logging income and expenses, setting category budgets, monitoring spending, and generating financial reports. Implemented AI-assisted category suggestions and money coaching, live budget alerts, CSV statement import, savings goals, and PDF report exports.

E-Commerce Application — Shahid Insaf Shoes Next.js | Express.js | Node.js | MongoDB

Developed a full-stack e-commerce application for Shahid Insaf Shoes with product browsing, category-based shopping, cash-on-delivery ordering, order tracking, customer support, and a responsive storefront. Built the application with Next.js, Express.js, Node.js, and MongoDB for backend services and data management.

EDUCATION

Diploma in Software Engineering 2024 · 2027 | In Progress

Aptech

Three-year software engineering diploma covering programming, databases, web development, and software design practices; pursued alongside professional work.

BS Computer Science (First Year) 2026 · 2030 | In Progress

University of Karachi

Bachelor·s degree in Computer Science; currently in first year, alongside professional development work.

Intermediate · Faculty of Computer Science 2024 · 2026 | Completed

Islamic College Karachi

Pre-university computer science track covering programming logic, discrete mathematics, and ICT fundamentals.

Matriculation 2022 · 2024 | Completed

Kiran Academy

Foundation in mathematics and computer science fundamentals, with a focus on analytical problem solving.
